

TIME LIMIT FOR GRADUATE DEGREES

Time Limit for Graduate Degrees

The degree program (as defined in the plan of study) for bachelor's degrees must be completed within five consecutive calendar years. Course work over five years old at the completion of the degree program (as defined in the plan of study) cannot be used for a bachelor's degree. The first day of class of the earliest course which appears on the student's plan of study is the beginning of the student's graduate education.

If the student is not enrolled for two consecutive semesters, they must contact the advisor for options (e.g. leave of absence or may be considered disenrolled from the program).
