

# GENETIC COUNSELING

## Degree Offered

Master's degree in Genetic Counseling (MGC)

## Length of Program

Our program consists of 62 credit hours over 21 months beginning in August and ending in May.

## Degree Requirements

All students must successfully complete the entire curriculum of the program in order to be considered for the Master's degree in Genetic Counseling. Successful completion requires an average of 80% or above on all didactic and clinical courses unless specified otherwise in the syllabus. Students must have 50 logbook cases as defined by ACGC Standards. Finally, students must complete a capstone project as a requirement for graduation.

## Admissions & Tuition Admissions

The mission of admissions in the College of Allied Health Professions is to advance evidence-based recruitment and admissions practices that are inclusive, equitable and balanced with respect to experiences, attributes and metrics to recruit and admit applicants for the purpose of preparing highly competent, collaborative and compassionate professionals dedicated to improving the health and healthcare of all individuals and communities.

Enrollment in the Genetic Counseling Education program is limited and competitive. The Genetic Counseling admissions committee, composed of program faculty and administration, evaluates the qualifications of each applicant and makes the final selections for admission.

For specific Genetic Counseling admissions, application, and timelines, visit: [Genetic Counseling Admissions](#).
