

# CANCER RESEARCH (MS)

---

## Graduate Committee

Dr. Joyce Solheim (Chair & Program Director), Dr. Jennifer Black, Dr. Pi-Wan Cheng, Dr. Babu Guda, Dr. Keith Johnson, Dr. Xu Luo, Dr. Aaron Mohs, Dr. Youri Pavlov, Dr. Angie Rizzino, and Dr. Pankaj Singh

Scientists with Master of Science degrees can make many important contributions related to cancer, which is a very widespread and often deadly disease. Students have the option of obtaining a Cancer Research MS degree after writing a research thesis (Thesis Option) or without a research thesis (Non-Thesis Option). Graduates with the UNMC Cancer Research MS degree have taken positions in personalized medicine counseling, in management of research laboratories, and in directing community-based health projects.

## General Requirements

- Completion of at least 30 semester credits beyond the bachelor's degree, including both lecture coursework and research credits
- Completion of coursework
- Completion of the comprehensive examination
- Completion of a research project consistent with a master's level achievement
- Completion and successful defense of a master's thesis (Thesis Option only)

Code	Title	Credit Hours
BIOS 806	BIostatistics	3
CRGP 880	Principles and Methodologies in Cancer Research	2-3
