**DOCTOR OF NURSING PRACTICE COURSES**

**NRSG 701 IMPLEMENTING EVIDENCED-BASED PRACTICE 3 Credit Hours**
This course builds on an understanding of the scholarship of nursing and the concepts of evidence-based practice. It will prepare students to critically evaluate theories, concepts, and methods relevant to the review, analysis, synthesis, and application of scientific evidence to nursing and interprofessional healthcare practice. The ethical, economic, cultural, and political implications of innovations in evidence-based practice will be explored. 3 credits, seminar
Prerequisite: NRSG 731, BIOS 806 or equivalent or permission of instructor
Corequisite: BIOS 806 or equivalent or permission of instructor

**NRSG 702 METHODS FOR ASSESSING CLINICAL PRACTICE OUTCOMES 3 Credit Hours**
A variety of approaches can be used to evaluate health and practice outcomes. In this course, students will explore the strengths and weaknesses of different methodologies and data when compared to a variety of clinically relevant issues. Examples of methodological approaches include the use of surveys, observations, and/or interviews, and quality improvement processes. Examples of data include the use of secondary data sets and/or epidemiological data and clinical records data bases. The use of different methodologies combined with the cultural, ethical, political, and economic implications for practice will be explored. 3 credits, seminar
Prerequisite: NRSG 731
Corequisite: NRSG 701, BIOS 806 or permission of instructor

**NRSG 703 CHANGING COMPLEX SYSTEMS TO IMPROVE HEALTH CARE DELIVERY 2 Credit Hours**
Students will explore strategies to create, sustain, and evaluate change in complex micro-and-macro systems. Students will engage in futuristic visioning and scenario building to address emerging practice and health care problems. Solutions to complex systems issues will be proposed within the context of relevant ethical, political, economic, and cultural factors. Students will use collaborative and interprofessional skills to explore proposed system solutions. 2 credits seminar/2 credits practicum (90 practicum hours)
Prerequisite: BIOS 806, NRSG 731
Corequisite: NRSG 701 or permission of instructor

**NRSG 704 CLINICAL INQUIRY 1-12 Credit Hours**
Students will further their exploration and analysis of their selected client, population, and/or system. Student’s own evidence-based analysis and data from either clinical practice and/or epidemiological studies will be used to guide the design and development of interventions directed at practice change, system changes, or aggregate health improvements. Analysis of socio-economic, cultural, ethical, and political implications continues. Building on the student’s work, practice interventions are refined. Under guidance of their academic advisor, students implement their designated project and evaluate. Plans for or evidence of dissemination occurs. The clinical practicum hours provide students the opportunity to apply knowledge and newly acquired skills to the practice setting. Practice settings will vary depending on student’s interest and career goals. The primary aim of the practice work is to design, implement, and evaluate change that will improve health outcomes for individuals, families, communities, and/or populations. Overall, the DNP practicum experience culminates in the scholarly project. Minimum 10 credits (450 practicum hours)
Corequisite: NRSG 731 or 703 or permission of DNP faculty advisor and DNP program director

**NRSG 709 HEALTH CARE POLICY 3 Credit Hours**
This course introduces students to health policy in the US government system and to the role of research in shaping health policy. Students will critically appraise a policy relevant to an area of research or practice and plan implementation strategies for policy change at the appropriate level of government. Students will develop verbal and written communication skills for effective translation of research and policy implications to lay and professional audiences. 3 credits, seminar
Cross List: NRSG 909.
Typically Offered: SPRING

**NRSG 731 TRANSFORMATIONAL LEADERSHIP 3 Credit Hours**
This doctoral course introduces the PhD and DNP students to the concepts and principles of transformational leadership within the healthcare context, and focuses on developing bold ideas, new behaviors, and new vulnerabilities with increasing interconnectedness and complexity in order to achieve new results. Leaders are challenged to implement and sustain organizational and information change to support the healing and caring that lead to lasting change. The three major constructs of transformational leadership include: Self transformation, Patient centered transformation, Health systems transformation.
Cross List: NRSG 931.
Typically Offered: SUMMER

**NRSG 755 HEALTH CARE ECONOMICS AND FINANCE 3 Credit Hours**
This course prepares students to critically evaluate the role of health care economics and financial planning, analysis, and management when creating changes within systems. Key components explored include health care economics, financing and budgeting, and the relationship between finance, economics, quality, and ethical use of scarce resources. This course will include application of key principles and methods of financial analysis, cost analysis, and business planning to determine the financial feasibility of systems change projects. 3 didactic credit hours.
Typically Offered: FALL/SP/SU
