

PROGRAM COURSE SEQUENCE

Program Course Sequence

Course offering sequence is dependent upon student need and faculty availability. BSMITS DAO student plans of study are assessed on a semester-by-semester basis. A course offerings schedule is monitored by the BSMITS Program committee to assess student need. Courses with projected enrollment of less than five students are not offered unless the offering affects the students' progress in the program. Courses with a projected enrollment of greater than 25 students are assessed to determine if faculty assistance is needed or if the frequency of the course offering needs to be increased.
