### Procedures

#### Academic Performance

The grade earned in each course is determined by the course instructor. Appropriate methods of evaluation may include written, oral and/or

practical examinations, personal observation of performance, and appraisal of the quality of work performed for all required projects and assignments.

Any course for which all requirements have not been fulfilled by a student may be reported by the instructor as "Incomplete." The instructor thereby indicates that the student's progress in the course is satisfactory, and that the student has been allowed additional time to complete a course in which a passing grade is possible. Students must resolve a grade of "Incomplete" no more than one year from when the grade was issued; however, instructors may choose to grant a student less time to complete the course. If the student does not complete the course in the allowed additional time, a failing grade is reported for the course.

The faculty of each program reserves the right to recommend that a student withdraw if health, scholastic standing, clinical or laboratory performance, or other factors make it impractical and inadvisable for the student to continue in the program. For more information on program withdrawal, see Student Success and Academic Standing ([https://www.unmc.edu/cahphandbook/index.php/Student\\_Success\\_and\\_Academic\\_Standing/](https://www.unmc.edu/cahphandbook/index.php/Student_Success_and_Academic_Standing/)).
