

DOCTOR OF PUBLIC HEALTH, EPIDEMIOLOGY CONCENTRATION

Admissions Requirements

- MPH or MSPH from a CEPH accredited institution. Additional foundational coursework will be required for individuals who do not meet this requirement.
- A minimum of 3 years of relevant public health practice. See concentration prerequisites below for additional detail.
- Official Transcripts - Official transcripts are required from all undergraduate and graduate institutions attended.
- Letters of Recommendation - Applicants must submit 3 letters of recommendation from individuals who can speak to academic, practice and/or research abilities.
- Personal Statement - The personal statement should be no more than 1500 words in length and answer the following questions:
 - Why are you interested in pursuing a DrPH degree?
 - What are your specific areas of interest related to the concentration area you are applying?
 - How has your public health practice experience prepared you for the DrPH concentration to which you are applying?
 - How will obtaining a DrPH in the selected concentration area will help you meet your career objectives?
 - What are your personal skills and general preparation that will help you succeed in this DrPH program?
- Resume or CV - An updated resume/CV that includes: Employment history, relevant public health practice experience, volunteer/service experience
- TOEFL or IELTS Scores - Official Test of English as a Foreign Language (TOEFL) or IELTS scores are required of all applicants whose primary language is not English or whose undergraduate degree is from a college or university outside of the United States.
- Epidemiology Concentration Prerequisites: A minimum of 3 years of relevant public health practice experience with emphasis on epidemiology. Examples of such experience include but not limited to:
 - Designing, implementing, and evaluating a public health surveillance system
 - Collecting, analyzing, and disseminating public health data
 - Analyzing health trends and patterns in a population to assist in the development of interventions or needs assessments
 - Creating data visualizations and reports based on analysis results
 - Conducting data automation and linkages between systems
 - Responding to and advising on public health data requests, including data sharing and research agreements
 - Conducting outbreak investigations

- Designing and preparing surveillance and field investigation protocols, survey instruments, and surveillance forms
- Responding to public inquiries on epidemiologic issues

Detailed application and admissions criteria is located on the DrPH Admissions website at <https://www.unmc.edu/publichealth/admissions/doctorofpublichealth.html>
